

FILLING AND TESTING KIT HFP-CGH 3000

The HENNLICH filling and testing kit HFP is used to test and set the precharge pressure of piston or bladder accumulators with the 8V1 valve or Minimes M16x2 coupling. The kit can be used for almost all types of hydraulic accumulators on the market up to a precharge pressure of 200 bar.

THE COMPLETE FILLING AND TESTING KIT INCLUDES:

- » 1. Filling and testing device with connection directly to pressure reducer gas cylinder with pressure gauge of your choice (standard thread W24.32x1 ¼")
- » 2. 3m filling hose with connection 8V1-VG8 to accumulator gas valve
- » 3. 3m filling hose with Minimes connection M16x2
- » 4. Minimes coupling M16x2 with AG ¼"
- » 5. Plastic protective case
- » 6. Replacement seal for connection to N2 cylinder

HANDLING

Each filling and testing kit comes with detailed operating instructions.

TYPE CODE

PRESSURE GAUGE PRESSURE RATING [bar]	HFP - 250 - CGH3000 - 01
6 / 10 / 25 / 100 / 250	
Internal number	
CGH3000	
Index	

Example: HFP-250-CGH3000-01, HFP with 25 bar pressure gauge
